

## Idealphotonics Tube Frame-High

Mark & model : DGJ, The product, adopting ABS environment-friendly plastic, can be adjusted horizontally and vertically which is featured as stable structure and having patent. The distance between the cross section center of laser tube in horizontal direction and the ground is about 120mm-170mm.

Origin : Asia and Pacific Area China

Quality standard : International

H.S.Classification : Machinery & Electronics Electr.Element 8541

Semiconductor devices; light-emitting diodes etc.; parts thereof

## Tube Frame-Low

MMark & model : XGJ, The product is featured as easy operation and light weight. The elasticity of the product is capable to absorb the shaking caused by the transportation and protect the laser tube. The distance between the cross section center of laser tube in horizontal direction and the ground is about 80mm-90mm.

Origin : Asia and Pacific Area China

Quality standard : International

H.S.Classification : Machinery & Electronics Electr.Element 8541

Semiconductor devices; light-emitting diodes etc.; parts thereof
